

SUSSEX CATTLE SOCIETY

DNA TESTING REQUEST from 1st October 2023

Please send this form to the Society Office together with the sample/s. Collected by the Examining Veterinary Surgeon, Society Inspectors or by breeder/owner.

DNA SAMPLING AND TESTING

All young bulls inspected from 1st January 2021 must have DNA samples [SNP sample] taken to be held on record. Additionally samples should be taken from the Sire and Dam unless they have been sold/died. The Society will be paying for the Sire and Dam DNA verification but it will be the breeder/owner of the young bull who will pay for that DNA sample being added to the SNP Database.

The Polled Gene Test will be charged at cost.
